

PARKVIEW SCHOOL ESD PLAN FOR 2022-2023

The staff at Parkview School has discussed the ESD goals and has prepared goals for the current year

Current sustainability practices that are occurring in our building include

- Each student has their own water bottle to use
- Cups, and cutlery are available for use in the staff room
- Classrooms have their own whiteboards and markers

Expected Outcome	Strategies	Indicators	Data Collection
Social Justice	High School students volunteer in the classrooms to work with other students Recognition of Truth and Reconciliation Day Colony Cleanup Students volunteers with the community Monarch butterfly kits for the classroom	The number of students participating The quality of the interactions between students of different age and grade groups	Track the number of students who volunteer A record of the log hours for volunteer services
Reduce Paper Use	Use of white boards Double sided photocopying Reuse waste paper for art work or practice sheets An area for a recycling of paper Student can submit digital copies of assignments	More hands on activities in K-8 classes Decreased cost for concert decorations Decreased cost for art projects Borrowing of textbooks where possible for courses	Track the number of boxes of paper ordered Monitor the copy counter of the photocopier
Incorporating Technology	Reuse materials from previous years Limit student access to the photocopier and copier Increased the number of reading and math programs on iPads Use projectors to present materials	Reduced cost for learning resources and materials More selection of High School courses Less worksheets	Monitor materials purchased for use Increase of Technology courses offered to students Use of laptops and ipads in the classroom
Mental Health	Participate in swimming programs if offered Go on an entire school field trip Include activities days during the school year	Participation of students Planning for the activity days The variety of activities days	Number of participants
